RICHMOND, CALIFORNIA, FRIDAY, AUGUST 1, 1930

No. 30

Breaking Ground For Ford Plant Is Feted in Richmond Ceremony

Richmond Developing Ninety-First to Hold Its 12th Annual Reunion

A long line of Ford automobiles, interspersed with other makes of motor vehicles, paraded Macdonald avenue Wednesday, headed by the municipal band preceded the ceremony of breaking ground at the Ford plant site at the Richmond inner harbor.

The parade was followed by exercises at the plant, Thomas M. Carlson serving as master of ceremonies.

Speakers included Ira F. Groves, district manager of the Ford office, in San Francisco, who will be manager of the Richmond division, Mayor A. B. Hinkley, P. M. Sanford, president of the chamber of commerce, and other city officials added to the oratorical program.

Hundreds joined in celebrating the event, which is expected to add \$100,000 a week to Richmond's payroll.

Although Henry Ford's birthday fell on Wednesday, July 30, there was no personal message received from him recognizing the honors and activities by the Richmond celebrants. It may be that Mr. Ford considers breaking ground exercises common place and does not have time to bother about details.

Richmond has acquired 40 industries since Jan. 1, 1920.

Paper Cutter Knife Clips Boy's Fingers

Berkeley, August 1.—Llewellyn Hirtz, Edison junior high school pupil, who last May lost two of his fingers in the printing department of the school while operating a paper cutter, has been awarded \$500 damages by the Berkeley board of education. The boy had been warned to keep away from the cutter, but violated the rules in the absence of the instructor of printing. Payment of the money was advised by the district attorney's office on the ground of technical negligence. Safety guards have been attached to the machine to comply with the state law.

Walnut Creek Starts Town Into Three Districts

Walnut Creek, August 1.—The reorganizing of the city of Walnut Creek is now in progress. The city board of trustees have decided to divide the community into three districts by the proposed new zoning ordinance, according to Mayor Herman F. Wilson. The zones will be Main street, the business district, the residential and Locust street. Installation of additional street lights also is proposed.

Marble for Outdoor Use
The durability of marble for the garden has not been its distinctive beauty. . . for its unusual weathering qualities, its ability to withstand extreme changes of temperature and its imperviousness to moisture make marble the most practical of materials for outdoor ornamentation.

Money Well Invested
Money used to have no consideration has a definite moral value. This report must never be considered when considering this most important subject.

San Francisco, Aug. 1.—"Powder River, let 'er buck!" The cry that went up in the Argonne Forest in 1918 will be heard again, September 26 to 28 when the Northern California section of the 91st, "Wild West" division holds its twelfth annual reunion in San Francisco.

Plans are being laid for a three-day program that will eclipse all previous reunions, according to the committee in charge, with Saturday, Sept. 27, scheduled as the day of "the big push."

Backed by the municipal government and by numerous veterans' organizations, the 91st division association is arranging a program of parades, barbecues and entertainment to culminate the get-together of war time "buddies."

In view of its divisional reunion, the 363rd, "San Francisco's Own" regiment, is merging its reunion, an annual local event, with that of the 91st.

Sundew Gets Nitrogen From Captured Insects

The sundew is a plant that takes its nitrogen any way it can get it. If the ground does not provide it, it reaches up into the air and helps itself through the medium of flies and other insects which are attracted to its sticky leaves.

The leaves are covered with tiny, hairlike processes, each of which is tipped with a drop of honeylike substance that glitters in the sunlight—hence the name, sundew. Insects are lured and retained by this sticky substance, and while the victim struggles to free himself, other "honeydew" laden "hairs" bend over, completely envelop and soon smother it to death.

Certain juices are secreted by these hairs, which digest the prey so that it can be used by the plant. When the digestion is completed the ensnaring hairs bend back and permit the remains to be blown away. The question is must people's minds at this point is: "Does the plant have voluntary control over these ensnaring hairs?" Some scientists credit the plant with a highly developed nervous system, but most believe the process is a mechanical one.

Plants bend toward the sun. One of the factors causing this movement is the loss of water from the cells on the exposed side, causing those cells to shrink and allowing the plant to bend in that direction. Possibly a chemical substance given off by the insect causes a shrinkage of the cells closest to the insect, thus making the hairs bend in that direction.

Dutch Harvest Festival Dates From Middle Ages

One of the quaintest and most interesting festivals of Europe is the Kermis, held each year in many Dutch towns. This fête is half religious and half commercial in its origin, and in the early Middle Ages was held in the market place, which usually adjoined the church. The church gave its sanction to the feasting and rejoicing natural to the harvest days. The fête is usually held in September. The religious aspect has disappeared and the Kermis itself is no longer celebrated in some towns, but in others it remains. Feasting, drinking, dancing, merry-go-rounds, play booths and all the fun of the fair go on until long after midnight. The freedom from a year's restraint makes many of the hours as wild as Buffalo Bill's West, but you do not know your Dutchman until you have caught him at a Kermis.—Boston Globe.

Hemans
Jack spent his holidays shopping with his aunt and was fascinated by the crowd, many of whom carried bright umbrellas. On reaching home that night he remarked: "Aunt, I want a fanned umbrella!"
"A fanned umbrella? But why?"
"To keep its ribs warm," he said.

Cleveland Dedicates Its New Union Terminal

Cleveland's new Union Terminal, on Public square, has just been dedicated with much ceremony. This picture shows the Terminal tower as it appears to travelers entering the city from the west. The entire project will cost \$150,000,000 and includes the Union station, a hotel, Medical Arts, Midland Bank and Builders' Exchange buildings and a large department store, all being interconnected.

Nearly Nine Millions Collected in Fees

Sacramento, Aug. 1.—The division of motor vehicles announced today that \$8,810,229.74 was collected in motor vehicle registration fees during the first six months of 1930, of which \$6,167,154.52 is being apportioned equally between counties and the state division of highways for repair and maintenance of roads.

Contra Costa county, with the total of 24,387 registrations for the six month period, is receiving \$38,524.11 as its share of the apportionment.

Los Angeles county with 803,725 motor vehicles registered, is the largest; San Francisco is next with 147,508 registrations; Alameda county is next with 140,168 registrations with \$219,622.06 apportionment; Alpine county, registering 91 vehicles receives \$142.58, the smallest apportionment. Total for the first six months is 1,968,012.

People Greet News of Proposed Tax Cut

Martinez, Aug. 1.—A reduction of 5 cents on the municipalities tax rate and 10 cents for outside territory seems assured for Contra Costa county with announcement by the board of supervisors that the hall of records tax would be cut from 20 cents to 15 cents and the county road tax would be cut from 35 to 30 cents.

It is understood the board favors the inclusion of a 2c levy for a fund of \$19,000 to aid the salt water barrier educational campaign.

Railroads' Police Forces

The Rock Island Magazine says that practically every railroad of any consequence maintains a special service, or police department, for the purpose of protecting its properties and its passengers against thefts, and the traveling public against the operations of pickpockets, confidence men, gamblers and other species of crooks. The larger trunk lines employ from 100 to 300 men in this department at an approximate cost of from \$200,000 to \$500,000 per year.

Founder of Vassar

Vassar college was established by Matthew Vassar who was born in the county of Norfolk, England, in 1702, emigrated to America, and settled at Poughkeepsie, N. Y., where he made a comfortable fortune as a brewer. In 1861 he gave the sum of \$400,000 to found Vassar college, near Poughkeepsie. He died June 23, 1865, while reading an address to the trustees of the college. Besides the initial gift, he left the college a large sum in his will.

The Terminal "Scoop"

The Richmond Terminal newspaper has taken a "scoop." It has been unmercifully "scooped." It failed to get the story of the signing of the Ford contracts in its last issue.

Maybe we should hang our editorial head in shame. The Terminal went to press at 6 o'clock Thursday evening and the story broke at 7, two hours later. The signing of the Ford contracts was an "extra," so "scooped" us. Had we run an "extra," all would have been well.

Of course "that 'roon' an' 'roon' feller's column," on The Record couldn't resist, so he took us to task.

The comments indicate one thing to us—that the two local dailies consider it a remarkable feat of journalism to have beaten The Terminal to it.

We do not argue with them on the issue, but willingly accept their implied compliment, that to beat The Terminal is sufficient justification for any paper to crow about. Gentlemen, we salute you and thank you.

Tailor's Good Purchase

Mankato is the Minnesota town that was bought seventy-five years ago by the first tailor in St. Paul for a small barrel of pork and some salt. This tailor was Parsons King Johnson and his purchase was made from Chief Sleepy Eye. The site on which Mankato stands is rich in historical interest, says the Kansas City Star. Indian mounds have shown that savages dwelt there 500 years ago, burning, glazing and decorating pottery, weaving cloth and raising corn. Mankato's first regular minister rode all the way from Waukegan, Ill., on horseback in 1834 to open his church there. The first Scandinavians, led by Rev. John Tildand and John Randall, arrived in 1838, and a German colony from St. Charles, Mo., arrived in a covered wagon the same year. In 1836 a Welsh colony from Wisconsin swelled the population.

Watch How You Walk

"I was recently walking with a doctor who makes nervous diseases his specialty, writes a correspondent. He said 'Look at this woman in front of us. Watch how she gazes this way and that. She doesn't keep a straight course for a dozen steps at a time.' I watched; it was as the doctor said. He went on to tell me that a great many women and some men walk in this way. It indicates weakness of purpose, indecision, a restless temperament. 'If people walk straight, they probably think straight,' the doctor said. 'A walk like that is a symptom of something wrong. It's a symptom of a great many people display.'"

Coroner Aubrey Wilson Has Many Strong Supporters

Aubrey Wilson, for the past four years county coroner, is seeking re-election on his merits, and from reports received it looks very favorable for his continuance in office. Especially is this true of country districts, in the eastern part of the county, in and around Walnut Creek, Concord and the territory which is settling up so rapidly by city people, who have acquired the small acreage country homes away from the noise and din of city life.

The office of coroner is an important one in county affairs, and is a position of great responsibility. Aubrey Wilson has the fine personality, the adaptability to fit in in all the situations which arise in the experience of a coroner. He is endowed by nature with a keen intellect and a quick conception for the sensibilities of the aggrieved ones with whom he comes in contact in the performance of his duties.

With his splendid record as an official, together with his dignified and clean campaign, Aubrey Wilson should easily succeed himself at the primary election Aug. 26th.

RANDOM COMMENT

Get ready for the elongated 1930 ballot, the longest in the history of the state. The ballot will carry the names of more than 300 candidates and twenty constitutional amendments.

Henry Ford's birthday fell on Wednesday, July 30, the day of the celebration at Richmond in honor of the automobile manufacturer's proposed assembling plant. However, Ford was on his way from Detroit to East Orange, N. J., where he visited his old friend Thomas A. Edison, and may not have been aware of our wonderful booster demonstration we were staging on his 67th anniversary.

In the good old days the man who saved money was a miser. Now he's a wonder.—Ex.

A Little Praise and Appreciation For the Worthy and Faithful Up County.

County Recorder

Irene Hurley, County Recorder, is one who deserves praise for the excellent service she renders, assisted by an expert office force. Succeeding her husband in office after his death, Mrs. Hurley has kept the service up to the same high standard, and although the business of the office has increased wonderfully in the past eight years, she has given the same excellent service for which Michael Hurley was famous.

Recorder Irene Hurley has surrounded herself with a corps of competent help in the different departments of her office, is an official of pleasing personality, and those having business at the recorder's office will find her the same accommodating and courteous county official whose friends are legion.

County Auditor

Al T. Sullenger is another good county official, tried and true, of long experience: "the best auditor in seven states," and no foolin'. Cautious, well liked, Al Sullenger has a world of friends. We would like, to have another quail hunt with him, but the chaparral is not so easily "penetrated" as it was 20 years ago, before our hair began to "frost" and our joints were more nimble. However, Al Sullenger has surrounded himself with

The peculiarities of the present political campaign in Contra Costa county seems to be unprecedented. Never in the political history of the county has there been such a dearth of prospects for public preferment.

There is a logical reason for this, it seems, and we account for it this way: The incumbents are so well fitted and qualified for their respective jobs, why change? The service they render in the majority of cases, is 100% plus. This includes efficiency in all departments and the help in the different offices. This is attributed to the heads of departments who select their assistants to transact the county's business.

County Clerk

In commenting on the county's officials, there is the clerk, Jasper H. Wells. Where could this veteran official be excelled in the conduct of his office in Contra Costa county; and for that matter, the whole area of northern California. The records prove his worth. It would be ungrateful to this man who has sacrificed the greater portion of his life in serving the people of Contra Costa county, not to sound a few praises occasionally. His original method of handling the affairs of his office, his systematic and modern ways of doing things quickly, has impressed the observing people of the county of his value. He is deserving and worthy. Give him your compliments when visiting your ballot August 26.

the most efficient help, and his accuracy as an accountant and the modern methods employed in his office are acknowledged to be in advance of many of the counties twice the population of Contra Costa. Al Sullenger has served the county many years as auditor. The people appreciate him and will keep him on the job until he "cashes in."

[Other candidates and incumbents in office will be given attention in following issues preceding the primaries.]

HEALTHY COMPLEXIONS

Healthy complexions come from healthy systems. Free the body of poisons with Feen-a-mint. Effective in smaller doses. All druggists sell this safe, scientific laxative.

Feen-a-mint FOR CONSTIPATION

Modern Clarence Darrow, the lawyer, related at a dinner in Chicago the story of a man whose double life had been exposed.

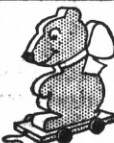

"The man claimed," said Darrow, "that nowadays we are all entitled to double lives. He pointed to this playwright and that novelist who advocate free love. But he was put out of the church anyhow. His claim didn't go over.

"As one of the church deacons remarked to me afterward, his claim had about as much sense to it as the bismarckist's:

"What is home without another?"

Just Like One Pompous Manager—Jones can you tell me why all the clerks call me "Appendix"?

Clerk—Well, sir, they say you are easily irritated and nobody knows what use you are.—Passing Show

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drug store; the genuine always bears Chas. H. Fletcher's signature.

CALIFORNIA NEWS REVIEW

The Vallejo city council has opened bids at the City Hall for a new motor driven street sweeper.

Valuation of property in Amador County for 1930 has been set at \$7,875,297, an increase of \$652,794 over the 1929 figures.

Walter Smith has been named principal of the Wheatland High School, succeeding A. L. Joyal, who resigned to resume studies at the University of California.

The dredge Endicott is to be used this summer to deepen along the seawall at Mare Island. The dredge will also deepen the submarine basin north of the seawall.

A county road budget totaling \$108,000 for 1930-31 has been approved by the Board of Supervisors at Oroville. The sum is for building new roads and maintenance of present highways and bridges.

Engineering crews are doing preliminary work on the Weed-Klamath Falls road. The work covers a stretch of three miles beginning at the northern boundary of the national forest and extending to Pineland.

Humboldt County's fifth annual dahlia show will be held at the Eureka woman's club August 1 and 2. The event is being arranged by the chamber of commerce and the woman's club. Prizes will be offered.

Colonel Richard B. Barnitz, director of the municipal airport, learned that Los Angeles has been designated as the starting place for the annual non-stop air derby that will end in Chicago during the national air races in August.

The Fresno City Commission, acting on complaints received from various sources throughout the city, passed an ordinance prohibiting the operation of radios in business houses between the hours of 9 a. m. and 9 p. m., with the exception of quasi-public celebrations.

Organized to promote a better understanding of mines and mineral resources, also to develop mining properties, articles of incorporation of the National Mining and Exploration Company were filed with Secretary of State Frank C. Jordan recently. The company, which will maintain headquarters in San Francisco, named the following directors: Frederick L. Harrington, Piedmont; Fletcher Hamilton, Woodside; Ralph W. Scott, Atherton; Roy T. Haas and Knight Starr Jordan, both of San Francisco.

Bank of Italy and Bank of America now have under way negotiations for the purchase of the defunct First National Bank of Fresno, according to reports. Officials of the local banks and T. E. Harris, chief national bank examiner, representing A. E. Price, receiver of the Fresno institution, had consummated conferences relative to the deal. Harris declared that negotiations were under way and that in all probability would be closed shortly.

San Benito County's five supervisors will determine the annual county budget. Although every county department is sending in a higher budget than usual and the county schools department is sending in one about 10 per cent larger, it is expected that they will all be slashed to the bone. Jack Etcheverry, chairman of the board, asserts the county cannot stand a high tax rate this year, and that every possible effort must be made to keep the rate as low as possible.

Improvement of the Ebbetts Pass road between Big Meadows and Bloods started following announcement that a special state appropriation had been made for the project. The amount allotted was not announced, but it is reported the project will cost \$100,000. Sharp turns on the road will be eliminated and a long stretch over granite will be surfaced. The improved section on the Mother Lode highway between Angels Camp and San Andreas will be opened in August.

The California Supreme Court found a parent for the large slug of orphan gold that has lain about the United States Mint for several months. The gold was brought to the mint to be coined when the matter of ownership arose. It was found to have been stolen from the Argonaut, Eureka Central and Kennedy mines, Amador County. In spite of this, however, M. Miladovich, who had possession, claimed that he had bought it in good faith and was entitled to the profits. The court ruled that, regardless of Miladovich's honesty, the gold should revert to its true owners, and it was assigned to the management of the mines.

Lee T. Pence and Francis S. Hawks ofameda, have purchased the property of the Central and Ice Company, plant at Redding, and Mrs. Frank A. Hawks. The consideration is said to have been \$40,000.

Containing the government failed to allow San Francisco Public Service Corporation filed suit in Federal court to recover \$589,000 income tax paid for the years 1923 and 1924. The suit is directed against John P. McLaughlin, controller of internal revenue.

An attachment from the Superior Court of San Francisco was levied by Sheriff W. W. Sublett on the mining property of the Redding Consolidated of Nevada, Inc. The attachment is for \$10,857.67 to satisfy a claim made by W. O. Stevens. The attachment not only covers the forty mining claims, but all machinery and the electrical transmission line.

Plans to construct an eight story structure to be known as the Medical Arts Building are being made at San Jose following announcement of the project by the H. W. Weeks firm of architects. The building will be located on West Santa Clara street, with offices exclusively for doctors and dentists. Bids will be received in October and construction is expected to start in November.

Foundations of the \$500,000 plant of the Pacific Coast Paper and Pulp Company's mill at Richvale are completed and construction of the building will be pushed. W. P. Martin, secretary, said. The mill will consume about 20,000 tons of rice straw annually in the making of wrapping paper.

Work has begun on grading the entire 110-acre surface of Chelms airport, under an agreement reached by the Marysville Council, Hemstreet & Bell, contractors, have equipment on the field and agreed to undertake the work on a day labor basis. With the city setting aside \$10,000 and the county putting up \$5000 this year, with each appropriating half that amount in 1931, completion of a modern airport at Marysville will be speeded.

Enough gold remains in the gravel beds of California to make at least five hundred millionaires. The quantity of gold available to hydraulic mining properly safeguarded is estimated at between \$200,000,000 and \$300,000,000, said Walter M. Bradley, State mineralogist. A safe average is probably \$500,000,000, he said. Among the gold producing states California still keeps the lead it gained in 1849, said Bradley. Of the \$40,000,000 of gold mined in the United States last year, California produced \$8,500,000.

One of the longest and most difficult jobs ever attempted by the airways branch of the government is completed. The last beacon light for the night flying through the Sierras has been erected and in use. All emergency fields are lighted. Notification that the route is ready for scheduled night flying has been given the Post-office Department by the airways branch. The last beacon being erected near the California-Oregon line makes a total of 130 beacons between Portland and San Francisco and so spaced that a pilot on the route at all times can see at least one beacon.

California forests will find it difficult to burn this year. Word that this state will receive a federal allotment this year of \$147,715 to be used in forest fire prevention and suppression came to S. B. Shaw, regional chief of the U. S. Forest Service. The amount, he says, is an increase of \$57,000 over last year and \$90,000 more than was received by the state in 1928. The fund is to be expended by the state forester in conjunction with state appropriations for the same purpose, in the prevention and control of some 19 million acres of private forest, brush and range lands.

Compulsory education was in effect in California long before the coming of the white man! Not only elementary schools, but also high schools, were conducted by California Indians, according to discoveries announced by the department of anthropology of the University of California. Definite evidence of an organized school system among the aborigines was gathered by E. M. Loeb, lecturer, who followed up clues uncovered by Professor A. L. Kroeber, chairman of the department, in a study of the Yuki Indians. Loeb gathered additional evidence with regard to the Yukis and also found similar systems among other tribes, the Kato and Wallaki, in the southern Red river district.

Northern California will be the scene of intensive geodetic surveys during the coming fiscal year, according to announcement by Captain T. J. Maher of the Coast and Geodetic Survey. A line of levels will be run up the coast from Sausalito to Astoria, Oregon, to detect any topographical differences in certain territories since the last leveling survey several years ago. Maher said: "Certain triangulation work will be conducted in the San Joaquin Valley from Mt. Diablo to Bakersfield, to determine the exact geographic positions of certain small peaks and hills. This will aid in topographical mapping." During the fiscal year the geodetic department will conduct approximately 9000 miles of leveling and 3000 miles of triangulation. Much of the work will be in cooperation with the advisory committee of geodesy of the Carnegie Institution in Washington.

More than 180 men are employed by the Humboldt Redwood Lumber Company, which opened its woods operations about the middle of July, according to an announcement made by Marjorie Knighton, who is in charge.

Articles of incorporation have been filed by the Calbreck Asphalt Company, showing 2000 shares at \$200,000 and 200,000 shares at \$100,000. The company owns the old bitumen mines near Santa Cruz that have been worked for over sixty years. The bitumen is treated and used for making roads.

TIRES OF NUDE LIFE EXPERIMENT

German Scientist Has Had Enough of Primitive

Los Angeles.—Primitive life seems to have palled on Dr. Friedrich Ritter, noted German scientist, although his affinity, Frau Doran, with whom he ran away, still clings to romance in the raw on the lonely Galapagos island off Ecuador.

This is the observation of Charles S. Howard, San Francisco globe trotter, who visited the couple in the course of his 66-day voyage from Florida on his yacht Sarah.

"The doctor and Frau were in the nude when we first saw them," said Howard, "but they donned clothes to greet us. They were so excited to see us they were almost irrational in their joy."

"I asked the doctor if they ever planned to return to civilization. Well, maybe, but she says no, never," he replied. So I guess the doctor, at least, is kind of tired of the primitive life and of his dictum of denying himself all food except fruit.

"He wears long hair and talks as though he considers himself inspired; but you can find a lot of folks like that without leaving California."

Ritter's trip to the island was promoted by a desire to escape the "boredom of civilization," and for the purpose of testing certain scientific theories relating to primitive nutrition and dietetics.

He left Berlin in July, 1929, with his woman companion, whom he had restored to health and who had expressed a wish to share his experiment. He spent his entire fortune on the trip.

The journey was made by way of Ecuador, where the couple bought a small boat to complete their travel to the Galapagos group—about 600 miles distant. Setting up a primitive domicile in the wilds of the island of their choice, the doctor and his companion engaged in testing the effect on their systems of a diet combining raw and cooked food, with raw cereals preponderant.

Salesman Kills Bear as Lumberjacks Hide

Longmont, Col.—Matching an old-fashioned rifle and his nerve against a huge black bear charging on a sawmill camp, Herbert Sullivan, Longmont salesman, killed the animal with his first shot.

Sullivan sells automobiles and has rarely fired a gun since his boyhood days on Fourth of July.

He had barely reached the sawmill in Big Elk Park, 30 miles west of Longmont, to deliver a new car, when a hatless lumberjack dashed into camp, shouting: "The bears are after us."

Sullivan asked if they had any firearms and was handed an old-time .45-70 rifle. He went out alone.

A few rods from the camp he saw two bears. They saw him at the same time, and one, a female, charged down upon him.

Sullivan aimed at its head as it rose on its hind feet and let go. The bullet struck the bear in the jaw and passed through its head. The other bear fled.

Sullivan told the story to friends here and brought the bear home to prove it. The animal weighed 250 pounds.

Shooting Bull Is Not Profitable, Man Finds

Burtensville, Md.—Shooting the bull is all right if one uses no more dangerous weapon than the tongue, but when it comes to slaughering it's an entirely different matter. William Miles, farmer, discovered.

John Matthias, a farmer, possessed a bull he prized highly. Recently the bull sought new pastures and, found them, so it is alleged, in Miles' cornfield.

Montgomery county police arrested Miles on a warrant sworn out by Matthias, charging cruelty to animals. The warrant set out that Miles beat patience with the bull, blazed away with a shotgun and then left the wounded animal to suffer.

Mosquitoes Gentlemen. They Prefer Blondes

Philadelphia.—Mosquitoes prefer blondes and will pass up a brunette nine times out of ten when there is a blond in sight.

This was the assertion of Herman Horning, city entomologist and an authority on mosquitoes and their habits. "Mosquitoes and flies are sensitive to light," explained Mr. Horning. "They are easily attracted to light-haired folks, both men and women, and seem to prefer fair people to dark. Another noticeable thing is that in fields where mosquitoes buzz around cows or horses it will be found that light-colored animals are the greater sufferers."

Cuckoo (the Clock Kind) Always Is in Season

Morehead City, N. C.—It may be illegal to shoot song birds but Jim Kelly got away with shooting the "cuckoo" in the clock. Game Warden Silas Brown said he was not justified in arresting Kelly for picking off the artificial bird. Jim was awakened at 3 a. m. by the cuckoo clock. He reached for a shotgun, fired at the bird and the noise ceased immediately. The bird retired in fragments behind its door.

LOVE PIRACY "MAN" EXPOSED AS WOMAN

Wed Girl When Her Brother Backed Down.

Minneapolis, Minn.—For 24 years Eva Mary Hotelling lived as a man because she could get better jobs and earn more money. She even married a girl to save the family honor when her brother fled to avoid responsibility. And now she has been named as the "man" who stole a married woman's affections!

The suit was filed in the shape of a divorce complaint by Edward S. Halstad, prominent and well-to-do jeweler, against Mrs. Maunette Halstad, who, he charges, treated him "cruelly and inhumanly" after she met "Donald Hotelling," which is the name under which Eva Mary has gone for almost a quarter of a century.

Halstad's amazement when he learned that his supposed rival was a woman—a fact that reached the authorities because some one close to Mrs. Halstad babbled—may be imagined. He and his wife have been estranged for some time as a result, she said, of threats which he made against her life.

When she sued for divorce he retaliated by naming the supposed man who had been a frequent visitor at his home and whose friendliness with his wife he believed to be due to a clandestine love affair between them.

Miss Hotelling, admitting she was the "Donald" named in the jeweler's complaint, expressed regret that she had been found out and her sex revealed.

"I was just sixteen when I first donned male attire," she said. "It was not done as a lark, but as the result of a deliberate plan when, seeking work, I discovered that it was very hard for a girl to get a decent job at living wages."

To detectives she said that when her brother, Donald, refused to marry a girl who was in trouble through him, she took his place and led her to the altar. For seven years they lived together, she said, and not even the girl's own family knew the truth until she died in 1923.

After an investigation the authorities held that if Eva Mary chose to wear trousers and call herself Donald there was nothing that could be done about it legally and she was permitted to go about her affairs.

Corrects Line of Poe on 'Statue, Is Jailed

Baltimore.—Incensed by a superfluous letter carved upon the Poe memorial statue in a park here, Edmond Fontaine, a plant pathologist, recently carried out a recently published threat that he would clip off the plural "s" in the carved script from Poe's "Raven." "Dreaming dreams no mortals ever dared to dream before."

"Thus read the inscription on the face of the monument while accepted editions of Poe's works have the word 'mortal' instead of the plural form. Fontaine is under arrest."

Asserting that the erasure made the line perfect and that there was no defacement of the monument because the letter was at the end of a line, Fontaine said: "Police say I had no business to do it, which is true, but art and poetry cannot bear up under the strain of seven years' waiting to have that error corrected. Poe himself would suffer agonies over such neglect by the Baltimore public."

Montana Voters O. K. New Yellowstone Span

Sidney, Mont.—Richland county's electorate has given Montana's building program added impetus by approving at the polls the proposed \$50,000 bond issue which will help finance construction of a new bridge across the Yellowstone river east of Sidney. Construction of the span will entail expenditure of \$350,000, of which federal and state governments will contribute \$265,000.

6,552 Eggs in 22 Years Faithful Hen's Record

Maud, Okla.—A hen that has faithfully laid eggs and hatched chickens for 22 years is owned by Sam Colvin, negro, living near here.

The aged hen has laid 6,552 eggs since 1908, according to the record kept by Colvin. She has 1,200 descendants. The hen has produced approximately \$1,033 worth of chickens and eggs for her owner and shows no intentions of quitting.

Anyway the Policemen Had Good Intentions

Columbus, Ohio.—Ashby Williams is still pondering over what is the most costly—robbers of police protection. When robbers recently made an attempt to break into his poolroom there, police arrived in time to frighten the invaders away. Investigating to ascertain whether anything was missing, the officers discovered four half pints of liquor and the fact that Williams was operating the place without a license. Arraigned the next day in court, the proprietor was fined \$225 on the two charges.

RHEUMATIC FEVER TRACED TO TEETH

Scientist Tells of Tests Made on Animals.

Philadelphia.—Jefferson Medical college has just completed experiments tending to prove definitely that rheumatic fever is the direct results of focal infections, such as infected teeth and tonsils.

This was achieved by managing for the first time to produce satisfactory infections artificially in animals and studying the immediate and subsequent results.

Dr. Virgil Holland Moon of the college laboratory announced the results and explained the methods of these experiments at clinical sessions in the amphitheater of Jefferson hospital, arranged by and for ex-interns of the institution.

He said that previous efforts at artificially inducing chronic focal infections in experimental animals had failed because the viruses used had been introduced under the skin by injection.

The new method employed an infected cotton swab, which was sealed in muscles or under the skin of the animals after incisions had been made.

This set up a chronic infection, which permitted development of symptoms in the animals corresponding "nearly exactly" to the symptoms of human patients suffering from rheumatic fever.

Autopsies on the animals proved that changes in the heart and artery tissues were identical with those found in autopsy on human rheumatic fever victims.

For several years physicians have suspected the direct relation of chronic focal infections to rheumatic fever, but experimental methods never before had permitted conclusive proof of the theory, Doctor Moon said.

Berlin Police Search Woman's Gambling Club

Berlin.—The Berlin police have discovered and raided a woman's gambling club. They gently but firmly arrested and jailed the seven members they caught playing. The scene of the raid was a private residence in Kantstrasse.

The women are of the sort who do not have to do their own housework, and they had become accustomed to filling their idle hours with playing cards for money. Driven out of their various clubs because of their passionate devotion to gaming, they formed a gambling club. They were playing rummy when the police burst in, although baccarat has been their usual game.

It was the first time in 17 years the Berlin Schupos have had occasion to raid a feminine gambling club. But they had presence of mind enough to sweep the cards off the table and carry them off for evidence.

Lowest of Monkeys Faces the Low-Down

Baltimore.—A lemur, one of the lowest of the monkey-like animals, classified by zoologists as relatives of the human race, has just been received at the laboratories of the Johns Hopkins University school of medicine. It is one of three brought in by a dealer in rare animals from East Africa. Prof. Adolph H. Schultz of the department of physical anthropology said the animal is to be kept for a time to study its habits and behavior. Then it will be sent to join some 800 other monkeys, apes and lower primates in the anatomical collection. The school of medicine of Johns Hopkins has the largest collection of these animals in existence.

Engineer Details Train to Save Boy; Is Killed

Hammond, La.—Rund Ford, engineer of the Illinois Central's Panguin limited, gave his life to save a fourteen-year-old boy. His freeman also lost his life.

When the boy's auto stalled on the tracks, Ford deliberately dived the train by speedy application of his brakes.

He failed to avert a collision and the auto was smashed. The boy, injured, will live. Ford and the freeman were scalded to death.

While dying the engineer revealed that years ago he had figured in a crossing fatality and resolved never again to be responsible for a death.

Indians Adopt Friendly Crow as a Lucky Omen

Glacier Park, Mont.—The Yellow Kidney of the Glacier National park reservation, recently adopted a crow which flew into their teepee through the open flap. She allows the bird its freedom, and it has steadfastly stayed by her, even sleeping in the wigwam nights. The Indians regard the friendliness of this bird as a good omen, and the tribe is making "good medicine" over it.

Raw Alaska Lands Are Luring Settlers

Anchorage, Alaska.—Every steamship from Seattle is bringing prospective colonists who are eagerly examining the fertile soil of Matanuska valley. These newcomers will have the choice of a huge area of valley land which now grows tall grass and groves of softwood trees. The usual homestead laws apply to settlement of the raw Alaska lands.

Rheumatism?

Quick relief from rheumatic pains without harm

To relieve the worst rheumatic pain in a very easy manner. Bayer Aspirin will do it every time! It's something you can always take. Genuine Aspirin tablets are harmless. Look for the Bayer Cross on each tablet.

BAYER ASPIRIN

Radio Guards Sailors A radio beacon system has been added to the equipment of the Highland light signal station, one of the principal guardians of shipping in treacherous Cape Cod waters. Information is broadcast to ships at sea four times daily, and in thick weather, the conditions are broadcast continuously, with one-minute blasts and two-minute silence. Any ship equipped with a radio set may listen in.

Canada's Pulp Production

The forest service says that the total pulp production in Canada has risen from 1,716,000 tons in 1919 to 3,608,000 tons in 1928. In the United States the production in 1919 was 3,517,000 tons and this production has risen steadily up to 1928 when it amounted to 4,510,000 tons.

Makes Life Sweeter

Next time a coated tongue, fetid breath, or acid skin gives evidence of sour stomach—try Phillips Milk of Magnesia! Get acquainted with this perfect anti-acid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort. Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer. Just remember Phillips' Pleasant to take, and always effective.

The name Phillips is important. It identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co., and its predecessor Charles H. Phillips since 1876.

PHILLIPS Milk of Magnesia

After Nervous Breakdown

"I had a nervous breakdown and could not do the work I have to do around the house. Through one of your booklets I found New Lydia E. Pinkham's Vegetable Compound had helped other women and I went to the drugstore and got me six bottles. It has done me good in more ways than you can imagine. Now I work every day without having to lie down. I will answer all letters with pleasure."—Harriet M. Evans, 1016 North 10th St., Minneapolis, Minn.

Lydia E. Pinkham's Vegetable Compound

Community Building

Comparatively Easy to Make Roads Beautiful

Four main ideas are to no small way the basis of the new public park. To utilize a wide area as far as possible, to utilize the trees and shrubs and flowers and the sunlight on the grasses. They are the basis of the new public park, which cannot travel from the beaten path.

But the roadside of America now is unimproved and broken. Nature is tucked away. Highways are full; the dirt piled with dumpings. The slopes are bare beside the hot-dog tracks. The road goes through to a destination, but the only destination which very often is the beauty on the way, is usually ignored.

To the building costs and maintenance of roads a 1 per cent addition, more or less, for adding planted things and natural vegetation would double the road's real value. At small expense parkways can be made along the public roads. Flowering trees can be set out. Slopes can be vine covered. The roadside can be made the most useful and most beautiful of the entire nation.

Without doubt a great value of the public roads is yet to be realized. They are used by motorists seeking natural beauty. A little more expenditure, with restrictive measures against eyesores, would make them what the traveler hopes to find.

Too Little Attention Paid to Attractiveness

To some extent there has been a growing regard for attractiveness in building of dwelling houses and the design of premises; in both exterior and interior plans for business places, great and small; in the construction of hotels, office buildings and apartments, and even in filling stations. But we still have investors who insist upon putting up merely utilitarian houses, plain, unattractive stores, dry goods box styles of apartments and other merely serviceable constructions, when for a little more outlay a much better investment could be made, or better results could be had even with the same expenditure of money and a little more application of intelligence. We still have house owners who could well afford to keep their houses and lawns in order, but put no value on the factor of attractiveness; who do not appreciate the importance to themselves of making a "good appearance"; who are content to live in relative dinginess when they could give themselves a brighter outlook on life from their private domain. —Philadelphia Ledger.

Warning in London's Growth

London is pushing out its tentacles far and wide among what were once the rural beauties of the home counties. The existing population, encouraged by motor transport and electric railways, is creating new suburbs. Factories recently erected in the Greater London area are causing, according to Victor Unwin, 20,000 people to move into it each year. A city which had all the potentialities of the most splendid in the world is spreading, not spreading, but dinginess, lawlessness, incivility and middle class and all this is occurring, not because there is no room, but because there is no plan. —London Daily Chronicle.

Environment Counts

People reflect their environment. Those who live in stately, down-at-the-heels houses are likely to feel depressed and discouraged. We borrow much of our confidence and spirit from our surroundings. If they have nothing to give—no hope or confidence, no pride in home or joy in living—then they become a liability of such proportions that only the most herculean strength can resist them. —Kneeland.

Give More Character

When discussing plans for the new home it should be remembered that "character" and "design" are two different things. A house may be designed well and yet be wholly lacking in character, or a house may be designed badly and possess character. Good design is obvious, but character is elusive and hard to visualize from a set of plans.

Trees Hurt by Wires

When heavy ropes drawn tightly around a tree trunk or limb may slowly strangle the tree by retarding or stopping the free circulation of water or food, says the United States Department of Agriculture. The careless use of a long pruning-hook or other implement for breaking off small dead limbs should be avoided, the department adds.

Pecan Trees Line Highways

Terrace County, Oregon, has a pecan highway. Its means of donations from various civic organizations more than 1,500 pecan trees have been planted along the highway.

RESERVE SYSTEM'S DIVIDENDS ANALYZED

Bankers Find Increased Payments to Member Banks Would Be Small Inducement.

Various proposals that member banks in the Federal Reserve System should participate more largely in its earnings through an increase in the dividend rate above the present fixed 6 per cent "would be a very small financial inducement" to them, it is declared in a recent study of this subject by the Economic Policy Commission of the American Bankers Association. This is shown, the commission says, by a theoretical forecast, on the basis of the past six years, of additional earnings that would be disbursed to member banks during the next six years under two plans introduced in bills before the United States Senate.

"The Fletcher bill, provides that Federal Reserve Bank earnings, after present 6 per cent dividends to members and completion of a 100 per cent surplus, should all be distributed as extra dividends to the stockholder banks," the report says. "If the earnings of each Federal Reserve bank were distributed among its own members there would be no extra dividends in the Boston, New York, Philadelphia, Cleveland, Chicago and San Francisco districts during the next six years, but the other six Federal Reserve Banks would pay annual extra dividends at the following rates: Richmond, 4.08 per cent; Atlanta, 4.08 per cent; St. Louis, 3.50 per cent; Minneapolis, 3.51 per cent; Kansas City, 5.48 per cent; Dallas, 4.88 per cent.

"If the earnings were pooled and paid out to all members in all districts each member would receive an average annual extra dividend of .78 per cent. Under this plan no franchise tax as now would be paid by the Federal Reserve Banks to the Federal Government.

Another Plan Analyzed

"The Glass bill would provide that, after present 6 per cent dividends, one-half the remainder should be paid to member banks as an extra dividend with the residue going to surplus and Federal Government as franchise tax. The average annual extra to members would be as follows: Boston District, 2.51 per cent; New York, 4.8 per cent; Philadelphia, 2.05 per cent; Cleveland, 2.09 per cent; Richmond, 3.28 per cent; Atlanta, 4.67 per cent; Chicago, 3.20 per cent; St. Louis, 2.02 per cent; Minneapolis, 4.75 per cent; Kansas City, 2.74 per cent; Dallas, 3.31 per cent; San Francisco, 1.87 per cent.

"If these extra funds were pooled the result would be an extra average annual dividend of 2.75 per cent for each member. Under this plan the system would still pay as now an annual franchise tax, amounting to \$1,941,996 on the average."

Clemenceau's Irony

On the day the peace treaty was signed at Versailles, Lloyd George was sitting beside Clemenceau in the great Salle des Glaces, where the ceremony took place, when he said with eyes wandering round the magnificent room: "Didn't something very important happen here once before?" Very dryly and without turning a hair the "Tiger" replied: "Yes, it was something rather important. The German empire was proclaimed here in 1871."

It was Clemenceau, too, who cynically said to Paderewski, then premier of Poland, during the peace conference: "M. Paderewski, you were the greatest pianist in the world and you have chosen to descend to our level. What a pity!" —Kansas City Star.

STATE TAX MEN AND BANKERS IN ACCORD

Months of Negotiation Lead to Agreement on Changes Broadening Method of State or Local Taxation of National Banks.

NEW YORK.—Months of conference and negotiation between an American Bankers Association special committee and the Committee of the Association of States on Bank Taxation have resulted in an agreement on a form of amendment to the Federal statute dealing with state or local taxation of national banks that "maintains the integrity of the protective principles of the section and is satisfactory to the commissioners' committee," says the American Bankers Association Journal.

Thomas B. Paton, the organization's general counsel, in making the announcement says that previously proposed amendments to the statute, which is known as Section 5213, have been opposed when it was felt their terms would enable any state to place banks in a tax class by themselves. "The law as it stands today," Mr. Paton says, "permits state or local taxation of national banks or their shareholders in one or the other of the four following forms: the share holder upon their shares—a property tax; the shareholders upon their dividends—a personal income tax; the bank upon its net income; the bank according to or measured by its net income. Only one form of tax can be imposed, except that the dividend tax may be combined with the third or fourth form if other corporations and shareholders are likewise taxed."

"The conditions permitted any of the four forms to be imposed, but the tax on shares must be at no greater rate than on other competing moneyed capital; the income tax on shareholders must be at no greater rate than on net income from other moneyed capital; the tax on bank net income must be at no higher rate than on other financial corporations nor the highest rates on mercantile and manufacturing corporations doing business within the state; the tax measured by net bank income is subject to the same limitations as the tax on net income of the bank but may include entire net income from all sources."

States Bank Broader Law National banks and their shareholders are taxed in different states under a diversity of systems, he says. The U. S. Supreme Court has held that the millage rate on intangible personal property is in violation of the present law where it results in national bank shares being taxed at a rate greater than that assessed upon competing moneyed capital. A number of states, unwilling to use the income methods permitted, had the alternative of either repealing the intangible tax laws or limiting taxation of national bank shares at the intangible rate. Therefore they sought a broadening of the permissive provisions.

Also, Mr. Paton points out, a Supreme Court decision held a state's income tax on corporations invalid where it included income from Federal and local government bonds in the excise measure. This created doubt as to some state bank excise taxes. "Conferences have been held to reach some agreement which would protect the banks, satisfy the tax commissioners and avoid a contest in Congress," Mr. Paton says. "From the standpoint of the tax authorities, the main objectives have been an amendment which would permit certain states to retain their low rate tax upon intangibles and at the same time derive an adequate, but not excessive, revenue from national bank shares, and an amendment which would permit certain states to tax corporations on their net income, excluding income from tax-exempt, and at the same time derive the same revenue from the banks as heretofore. From the standpoint of the banks, it has been deemed imperative to maintain the protective principles of Section 5213."

The Changes Agreed On "In the proposed amendment the existing provision permitting taxation of bank shares no higher than the rate upon competing moneyed capital has been modified with respect to certain intangible tax states only by a provision under which, instead of the moneyed capital limitation, the rate shall not be greater than the rate upon the shares of other financial corporations, nor upon the net assets of individuals, partnerships or associations employed in the banking, loan or investment business, nor higher than the rate assessed upon mercantile, manufacturing and business corporations with head office in the state."

"Also an added fifth alternative permissive method, designated as a special tax, permits a state, in place of an ad valorem tax on bank shares, to add together total dividends paid the preceding year and the increase in capital, surplus and undivided profits, less additions to capital or surplus paid in by stockholders, and to divide this total by the number of shares. The state may tax the shares based upon this amount, but not to exceed the rate on other corporations in proportion to their net profits."

"This method is designed for states which have heretofore taxed national banks upon their entire net income from all sources at a proportionate rate to that assessed upon business corporations. The amount which is the basis of the tax is the equivalent of the entire net income from all sources, but being assessed against the shareholder upon his property in the shares and not a tax upon the bank, it is not open to the objection as an indirect tax on exempt income."

Township Play Centers

New Recreational Idea That part of the Michigan Township Play Center has developed a new recreational idea. The people are organizing what they call "Township Playdays." Maybe the rest of Michigan will be interested to see what comes of it.

The township is the oldest, the simplest and most democratic political unit, but it seldom has served the purposes of a social group. The school district with its centrally located schoolhouse was more convenient.

But good roads and transportation are contracting big areas and wide spaces, and people more widely separated are coming to regard themselves as belonging to one neighborhood. Obviously if the township folks succeed in getting together by townships for their "playdays," the very size of the gatherings will lend an atmosphere of interest to the undertakings.

It is proposed to provide games and sports for all the people young and old, big and little, men and women. And there are to be professional sport directors to teach the backward how to play and to inspire all with that spirit of cooperation which will enable them to play together.

There may be more to this thing than appears at a glance. It is a capital idea to play with.—Detroit News.

Disadvantage to Have Trees Too Near House

The proper placement of trees in regard to the house is a problem all by itself. No doubt there is something extremely cozy-looking in a house tucked immediately against a tree, but the overhanging branches tend to cut down the chimney draft, offer more fire hazard, in case of lightning, and in other ways prove a detriment.

Trees placed at least 25 feet from a house offer better background values and throw even better shade. Their picturesque or "homey" effect is the one thing desired above all to secure this, trees in front of a house ought to be to one side, rather than directly in front, in order to frame the house. Thus two trees, one to either side, offer the maximum effect. In the front yard.

Large trees to the rear give background effect to be secured in no other way. Even here the center of lawn is best left clear, and the trees kept to the sides, unless they are of the extreme back of the lot, where they preferably may be in the center.

Must Speed Up Planting

During recent years tree planting has received great stimulus in the states largely because of the help that the federal government has been able to give. In 1925 only 18 states were distributing planting stock to its citizens, says the American Tree association. "Thirty-two states are now engaged in this activity. Nevertheless, it is going to be necessary to speed up America's planting program at least ten times in order to reforest our denuded lands with reasonable promptness."

Makes for Civic Good

Just as the improvement in the home influences the family, the modernization of a house does a certain amount of good for the community. In the last analysis, a city is but a collection of homes and anything that improves a part is working for the good of the whole.

Modernizing lifts up a city out of its ordinary commonplace position and transforms it into a live progressive community, filled with busy individuals striving for their betterment.

NOTICE TO VOTERS

Every person entitled thereto must register during the year 1930, thirty (30) days before election, if he or she may desire to vote. Registration for August Primary Election closes July 26, 1930. Registration for General Election closes October 4, 1930.

Make application for Registration to the County Clerk or any of his deputies.

J. H. WELLS, County Clerk, Contra Costa County, California. Dated: January 1, 1930.

Ain't It Th' Dooce?

The shipwrecked tourist had had terrible experiences on South Sea Islands, so on this occasion he did not relish his fate. Faint with fatigue he dragged himself toward the distant voices. At last he caught a glimpse of the party—they were sitting in a circle on the sand and holding objects, unrecognizable at the distance, close to their noses.

"This is some land!" asserted one. "Aw, rats!" came the raucous voice of another. "I only pulled a couple o' bones from that pot."

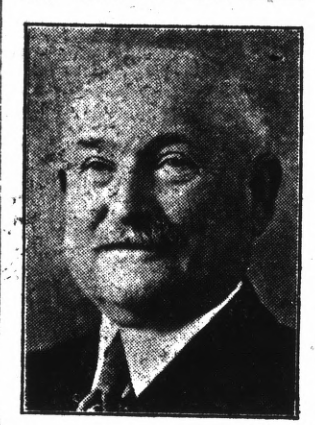

"Wot yuh griffin' for?" grated a third. "Yuh don't expect more'n a pair o' bones from a pair o' quinea, do yuh?"

The tourist rolled over on the sand and just before he breathed his last he gasped:

"Cannibals again!" —Pathfinder Magazine.

LEGAL NOTICES

SUMMONS

In the Superior Court of the State of California in and for the County of Contra Costa.
Olive Stearns, Plaintiff, vs. Chas. C. Jensen, A. V. Schmidt, W. E. Griffin, R. A. Wilson, C. A. Meyer, Luke Glayvinovich, Jay P. Hamner, George F. Hillon, Edwin Ambrose Devine, Irma Bowen, Wallace E. Miller and Helen Miller his wife, George W. Rowe, W. E. Williams, Gerrit Jan Moll, Justina Breckenkamp, Alvilda I. Hamer, Helen K. Johnson, John Reynolds, E. D. Dunbar and Ethel L. Dunbar, his wife, Edith Stage, W. J. Benson Company, a corporation, and also all persons unknown who have or claim any interest in or lien upon the real property hereinafter described, or any part thereof, Defendants.
Action brought in the Superior Court of the State of California, in and for the County of Contra Costa, and a complaint filed in the office of the County Clerk of said county.

D. HORNER,
Richmond, California,
Attorney for Plaintiff.

People of the State of California: Greeting:

Chas. C. Jensen, A. V. Schmidt, W. E. Griffin, R. A. Wilson, C. A. Meyer, Luke Glayvinovich, Jay P. Hamner, George F. Hillon, Edwin Ambrose Devine, Irma Bowen, Wallace E. Miller and Helen Miller his wife, George W. Rowe, W. E. Williams, Gerrit Jan Moll, Justina Breckenkamp, Alvilda I. Hamer, Helen K. Johnson, John Reynolds, E. D. Dunbar and Ethel L. Dunbar, his wife, Edith Stage, W. J. Benson Company, a corporation, and also all persons unknown who have or claim any interest in or lien upon the real property hereinafter described, or any part thereof, are hereby directed to appear and answer the complaint in an action entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Contra Costa, within ten days after the service of this summons; if served within this county; or within thirty days if served elsewhere.

You are further notified that the object of said action is to secure a partition of the real property hereinafter described according to the respective parts of the parties interested therein, for a sale of such property, or a part thereof, or that a partition can not be made without great prejudice to the owners.

The action is brought in accordance with the provisions of Part II, Title X, Chapter IV of the Code of Civil Procedure of the State of California, and the real property sought to be partitioned is particularly described as follows:—

PARCEL ONE
That parcel of land in the County of Contra Costa, State of California, described as follows:

Lot 16 in Block 7 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL TWO
Lot 5 in Block 3 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL THREE
Lot A and the north 1/4 of Lot 10 in Block 2 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL FOUR
Lots 46 and 47 in Block 16 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL FIVE
Lots 4 and 5 in Block 29 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on October 7, 1905 in Volume D of Maps, at page 57.

PARCEL SIX
Lot 23 in Block 4 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL SEVEN
Lot 21 in Block 5 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL EIGHT
Lot 5 in Block 8 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL NINE
Lots 2 and 3 in Block 11 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL TEN
Lots 11 and 12 in Block 11 as designated on the map entitled "Complete Map of Bay View Park, Contra Costa Co., Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1905 in Volume D of Maps, at page 56.

PARCEL ELEVEN
The westerly portion of Lot 1-C in Block 7 as designated on the map entitled "Official Map of the Town of Stege, Contra Costa County, Cal." which map was filed in the office of the Recorder of the County of Contra Costa, State of California, on April 4, 1916 in Volume 267 of Deeds, at page 400, which point bears south 87° 05' east along the south line of Potrero Avenue 371.82 feet from the east line of said Potrero Avenue (formerly Oak Avenue) thence from said point of beginning south 32° 05' west along the east line of said Breckenkamp Tract (267 D 400) being parallel with the east line of said first street, 123.77 feet to the south line of said lot 1-C; thence south 1-C, 25 feet; thence north 32° 05' east parallel with the east line of said Breckenkamp Tract (267 D 400) 127.3 feet to the south line of Potrero Avenue; thence north 87° 05' east along the south line of Potrero Avenue, 26.53 feet to the point of beginning.

Given under my hand and the Seal of said Superior Court in and for the County of Contra Costa, State of California, this 17th day of February, 1930.

(SIGNED) J. H. WELLS, (County Clerk)

By L. R. Geyer, Deputy Clerk.

C. D. Horner, Attorney for Plaintiff, 629 Macdonald Ave., Richmond, California.
